Frontend: React.js (ReactJS), Redux, Material UI (MUI), Vite, React Hook Form
Backend & Data: REST APIs, Django, Django ORM, Oracle Database, MuleSoft, Natural (mainframe)
Tools & Practices: Git, npm, Jira, Agile, code reviews, unit testing

PROFESSIONAL EXPERIENCE

Texas Comptroller of Public Accounts - Senior Software Developer (Front-End / React.js)

Austin, TX | June 2022 - Present

- Reconstructed and modernized legacy Java applications using React.js, Redux, Material UI (MUI), Vite, and React Hook Form.
- Built secure self-service web interfaces that replaced paper- and phone-based processes, reducing manual handling and improving user completion speed.
- Delivered production features for public-facing applications serving up to 17 million users within an agency responsible for more than $160 billion in annual state revenue.
- Improved system reliability from 95% to 100% uptime, preventing outages during peak usage periods.
- Collaborated with backend developers and business stakeholders to define requirements, clarify API contracts, and translate policy-driven rules into intuitive user experiences.
- Established and enforced front-end styling best practices, ensuring a consistent, clean user experience across applications.
- Integrated AI into daily engineering workflows, led discussions on high-value use cases, and guided team members in adopting AI tools effectively and responsibly.

The University of Texas at Austin - Software Developer Analyst (Full-Stack / Django)

Austin, TX | July 2018 - June 2022

- Developed and maintained Django-based web applications supporting medical student administration and internal operational workflows for athletics and financial aid, building full-stack features across frontend, backend, and database layers.
- Helped deliver the CARES Act application system under tight deadlines that supported distribution of millions of dollars in student aid.
- Mentored new hires with limited coding experience through UT’s training-to-hire program, while contributing through code reviews and pair programming.

Facebook (via Core Techs) - Ads Risk Analyst

Austin, TX | September 2015 - September 2017

- Served as a quality auditor and helped improve team accuracy from 87% to 95%.
- Acted as a subject matter expert in malicious ads and content moderation policy.
- Created answer keys for quality testing and helped establish improved review standards.

EDUCATION

University of Texas at Austin

Bachelor of Arts in Economics | Austin, TX | December 2013
